PROFILE

Motivated third-year Computer Science student at Kenyatta University with practical experience in software development, AI training and project-based learning. I enjoy turning ideas into functional software systems and continuously expanding my technical skills through hands-on projects. My career goal is to grow into a software engineer, develop practical systems for organizations, and progressively work with machine learning and artificial intelligence.

PROFESSIONAL DESCRIPTION

I have developed experience across programming, web development, mobile application development, databases and cloud-based application services. I am comfortable learning new technologies through practical implementation and solving problems encountered during development. I am currently strengthening my full-stack development skills while building a foundation for future work in machine learning and AI.

TECHNICAL SKILLS

Programming Languages Java • Python • C • C++ • JavaScript • Dart	Web Development HTML • CSS • JavaScript • PHP • MySQL
Mobile & Cloud Flutter • Firebase • Firestore	Development Tools Git • GitHub • VS Code • NetBeans • Android Studio • XAMPP
Firebase Tools Firebase CLI • FlutterFire CLI	Development Areas Software development • Database systems • AI training & evaluation

EDUCATION

Bachelor of Science in Computer Science — Kenyatta University Currently in 3rd Year	2024 – Apr 2028
Kenya Certificate of Secondary Education — Githiga High School Grade: A- (80 points)	2019 – 2023
Kenya Certificate of Primary Education — Archbishop John Njenga Primary School	2008 – 2019

WORK EXPERIENCE

AI Training & Evaluation — Handshake AI AI training and evaluation work	March 2026
• Participated in AI training and evaluation workflows, reviewing outputs and completing project-based tasks.	
AI Training & Evaluation — Outlier AI training and evaluation	2026
• Worked on AI-related tasks involving response evaluation, annotation, prompt-oriented work and coding-related tasks.	

PROJECTS

Farm Ledger — Flutter, Firebase & Firestore Farm management application	Sep 2026 – Present
• Developing a system for managing cattle, milk production, finances, expenses, reports and analytics.	
• Building and improving the system through practical implementation of mobile development, databases and software design.	
Personal Developer Portfolio — HTML, CSS & JavaScript Multi-page developer portfolio	2026
• Designed and developed a responsive portfolio showcasing projects, technical skills, professional background and contact information.	

TRAINING & ADDITIONAL EXPERIENCE

AI training and evaluation experience through Handshake AI and Outlier; ongoing independent learning in software development, full-stack engineering, machine learning and artificial intelligence.

HOBBIES & INTERESTS

Football • Reading • Fitness • Gaming • Coding

CAREER OBJECTIVE

To grow as a software developer and software engineer by contributing to practical projects, strengthening full-stack development skills, and eventually applying machine learning and AI to useful real-world systems.
